

We can help!

GreyLee Services Group

Executive consulting + systems integration + best-of-breed technology. One accountable SDVOSB partner for government modernization 2026-2035 — backed by expert teaming partners with decades of federal experience.

WHO WE ARE

GreyLee Services Group is an SDVOSB management-consulting and systems-integration firm that helps government translate federal mandates into delivered modernization programs. We hold single-point accountability for the outcome and bring expert teaming partners with decades of federal experience to the work. Our security advisory starts from an assume-breach posture map where an attacker could move, contain the blast radius by design, and keep the mission running through an incident.

WHY GOVERNMENT CUSTOMERS CHOOSE GREYLEE

1 Single-Point Accountability

We hold the contract and answer for the outcome — backed by a bench of expert teaming partners with decades of federal experience.

2 Independent Technology Selection

Not bound to any manufacturer's roadmap. Technology chosen on mission fit and evidence.

3 Mission First

Every engagement begins with mission outcomes, not a catalog of features.

4 SDVOSB Advantage

Supports small-business goals and opens set-aside and sole-source pathways under FAR 19.14 and VA VetsFirst.

5 Executive Program Leadership

Governance, executive reporting, risk, and acquisition support for multi-year programs.

CORE SERVICES

LOCATION	Collingswood, NJ

We plan for the breach that gets through. Prevention alone is not a strategy — we advise agencies to be measured on how far an intrusion spreads, not on whether one happened. Map the paths, contain the blast radius, keep the mission running.

STRATEGIC FOCUS

AI Governance & Responsible AI

EO 14179 · OMB M-25-21 · NST AI RMF

Zero Trust, Segmentation & Lateral Movement
